

Pressure Redistribution Pads

Application Guide

Dermisplus Prevent Pad

With versatile application, the Pads can be used to provide pressure redistribution to many areas of the body including the occiput, between the knees, under the chin or folded for hand contractures.

Dermisplus Prevent Strips

Ideal for protecting pressure points on digits, with medical devices* such as face masks or longer body areas such as the spine.

*Dermisplus Prevent can also be used under medical devices to prevent pressure damage. Example: oxygen masks, nasal specs, tracheostomy tubing and ties, rigid collars.

Dermisplus Prevent Sacrum

Designed for the sacral area, this dressing can also be used around other difficult to dress areas such as ankles or shoulders.

Dermisplus Prevent Heel

Available in two sizes (standard and large), the heel pad can be used long ways across the foot to protect the sole or across the heel to protect the back of the foot. It can also be used to protect elbows.
